Exclusively for the timber market comes a brand new form of security. As part of the Roto DoorSafe program the twist bolt door lock provides a reassuring barrier against intrusion. Through a single movement of the handle the T-Bolt is thrown and turned, creating an extremely effective form of compression and security.

The centre case also provides additional security via a sprung latch and central deadbolt, incorporating anti-saw pins.

**Twist Bolt Door Lock.** The latest development in the range of door hardware from Roto.
